

EC+ Enhanced Calcium Nutrient Booster

Enhanced Calcium
Nutrient Booster

Premium Enhanced Calcitic Lime Premium Grade (SGN 75)

Product Features

- EC+ enhanced granulated calcium carbonate is an efficient, fast acting and effective method of supplying available calcium to the plant. Also used to increase pH of acidic soils.
- EC+ is produced from high-quality calcium carbonate, finely ground to insure optimum availability.
- Contains PHCA Physio Enhancer.
- Treated to ensure very low dust content.

Turf Benefits

- Used to supply available calcium in spring and during summer months
- Reduces the toxicity of aluminium, iron, manganese, and copper in acid soils.
- Decreases potassium leaching losses.
- PHCA is a fertilizer additive derived from naturally occurring carboxylic acids. Makes other nutrients more available.
- PHCA helps to increase root mass and volume and enhances physiological processes within the plant.

Guaranteed Minimum Analysis

	%
Total Calcium Carbonate Equivalence	95.0
Total Neutralizing Value	95.0
Calcium (Ca)	36.0
CaCO ₃	80.0

Application Rates

Bag 22.68kg	Product application rate
	The proper application rate depends on soil pH and soil test levels of calcium.
	Golf Greens, Sports Turf and Residential Lawns: 2.5kg to 5kg/100m ² or 250kg to 500kg per ha
